SCS 440/450/460/660 CONSOLES

SCS 450

Raven SCS 440/450 sprayer controllers provide precision single product automatic rate control. The SCS 440 handles up to 3 boom section inputs, the 450 up to 6 boom sections and the 460 and 660 allow up to 7 boom sections. Two separate application rates can be pre-programmed into the controllers

and selected on the go with the flip of a switch. Application rates can be manually overridden to accommodate spot spraying needs. The SCS 440/450/460/660 are available with serial interface for GPS compatibility for variable rate application and data logging. User friendly programming, non-volatile memory, easy to read lighted display and data lock, combined with the reliability, accuracy and affordability of Raven systems make the SCS 440/450/460/660 consoles the right choice for single product chemical application.

SCS 4400 CONSOLE

Sprayer controller and data logger with 3 to 10-Boom control

Raven's SCS 4400+ Console merges spraying control and data logging into the same unit. The unit offers two programmable pre-set rates and simple data logging. The SCS 4400+ is GPS compatible.

This console can be used for liquid and/or granular application.

Features

- 5 product capability:
 - 1 product hardwired
 - 4 additional products via CANbus
- Easy to read 1/4 VGA monochrome display
- Data logging of all 5 products using storage card
- Equipped with 7 boom switches
- 3 to 10 boom control
- Multiple audible alarms for system monitoring
