

SCS SIDEKICK - CHEMICAL INJECTION SYSTEM

Building a Platform For Success.

PRECISION

The new generation of SCS-Sidekick direct injection system represents a quantum leap in spraying performance. Field results have shown that the SCS Sidekick system was accurate within seven-tenths of a percent while applying six cases of Horizon. The SCS-Sidekick provides precision, automatic single product, chemical injection control of most Emulsified Concentrates (EC). Features include up to 7 boom section inputs, audible and visual alarms, easy to read (day or night) data displays, simple programming, compact design, easy installation and many more. The SCS-Sidekick console was designed to "piggy back" to any existing single product Raven console. Ever-increasing chemical costs, mixing inconveniences, and safety concerns make direct injection of chemicals into a carrier stream an attractive alternative to traditional tank mixing. Unfortunately, cost has generally been an obstacle. The Raven SCS-Sidekick provides a low cost solution. The SCS-Sidekick is an affordable, direct injection add-on to any existing Raven single product control console. The SCS-Sidekick enables current single product Raven console owners to gain precision injection capabilities without purchasing replacement consoles, cables, etc. The SCS-Sidekick console installs with great ease. Simply route the cabling through the cab and out to the module; attach the console to the existing Raven console, power up, program and go! The SCS-Sidekick console has several user friendly programming features and non-volatile memory to retain programmed values in the event of power loss. All system information is available at the push of a button. The SCS-Sidekick injection module is available in high volume (10-200 oz./min.) and low volume (5-100 oz./min.) configurations. The SCS-Sidekick is supplied without a tank to allow the freedom to choose tank shape and capacity or with a tank (8, 16, or 24 gallon capacities) which creates a convenient all-in-one injection package. The injection module has been designed with a small footprint, reducing the area needed for mounting.

Sidekick kits include: console, cables, tank plumbing and injection module. Kits do not include mixer or check valves which must be ordered separately.

RA/	DESCRIPTION	PRICE
063-0172-511	Module, Hi Volume w/24 Gal. Tank	3,204.50
063-0171-964	Console, SCS-Sidekick	1,241.00
115-0171-130	Console Cable 15'	399.50
115-0171-138	Product Cable 27'	272.00
117-0159-760	Plumbing Kit	306.00
117-0159-915	Kit, Hi Volume with 24 Gal. Tank	5,601.50
117-0159-916	Kit, Hi Volume w/o Tank	5,083.00
333-0011-078	Check Valve 1/2" (8 GPM), (F) NPT	108.80
333-0011-091	Check Valve 1-1/4" (22 GPM), (F) NPT	96.90
333-0011-093	Check Valve 2" (70 GPM), (F) NPT	246.50
063-0159-632	Mixer 1-1/4" (F) NPT	149.50
063-0171-300	Mixer 2" (F) NPT	166.60
