

BATCH CONTROLLERS - SPEED SENSORS

RAVEN FLOW MAX 110 FLOW MONITOR

Now you can load from a nurse truck to a sprayer tank or from a chemical bulk tank to a transport truck.

The Flow Max 110 measures the liquid being pumped from one tank to another. An in-line flowmeter provides a signal to the 110 monitor which displays a readout in gallons.

The 110 console is an economical, single product flow monitor that provides the same reliable service and quality you have come to expect in other Raven flow control systems. Raven offers a variety of flow meters which allow the Flow Max 110 to accurately meter a wide range of flow rates and accommodate a variety of plumbing sizes.

Display features include batch volume, rate of flow, total volume measured, and sub volume measured. Operates on 12V, DC or 110V, AC with any standard AC to DC converter.

RAVEN PRECISION Solutions
Building a Platform For Success.

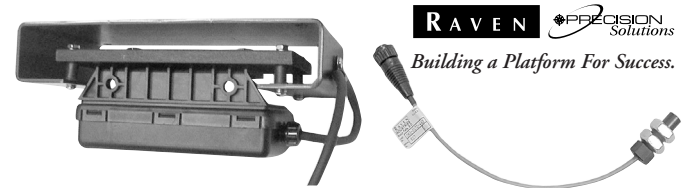

Order Choice of Flowmeter Separately
